

Najam Ul Saqib

London, UK | +44 743 8890 432 | 1najamulsaqib@gmail.com | linkedin.com/in/1najamulsaqib | github.com/najamulsaqib

A Full Stack Software Engineer with three years of hands-on experience building web and mobile apps, specializing in React Native, React, Next.js, Nest.js, Node.js, and TypeScript. Known for solving complex technical challenges, optimizing performance, and ensuring smooth, scalable architecture. With a strong track record of deploying high-quality iOS and Android apps, leveraging CI/CD pipelines for efficient automation. Proficient in databases like MongoDB and MySQL and experienced with AWS cloud services for scalable deployments. Focused on delivering fast, reliable, and maintainable applications while continuously improving development workflows.

WORK EXPERIENCE

Eilaf Labs

Full Stack Developer (Part Time)

Remote

Jun 2023 – Present

- Built and launched web and mobile apps using React, React Native and Nest.js.
- Deployed and maintained iOS and Android apps with smooth performance.
- Fixed memory leaks and improved app speed with smart optimizations.
- Created clean and scalable backend systems using Node.js and databases like MongoDB and MySQL.
- Configured and implemented CI/CD pipelines to automate the process of building, testing, and deploying applications, ensuring faster release.
- Designed responsive, intuitive interfaces to enhance user experience across all devices.
- Implemented AWS cloud services for efficient hosting, management, and scaling of applications.

Falcon Consulting

Full Stack Developer (Full Time)

Lahore, Pakistan

Jan 2022 – Dec 2023

- Built and deployed web and mobile apps using the MERN stack and React Native.
 - Integrated facial recognition and machine learning to improve user interactions.
 - Automated document generation processes, reducing manual effort and increasing efficiency.
 - Implemented CI/CD pipelines to streamline deployment processes and accelerate team onboarding.
 - Led a small development team, providing training in React Native and the MERN stack to enhance productivity.
 - Recognized as Star Employee of the Year (2022) for creating high-impact, cost-effective solutions.
 - Awarded Employee of the Year (2023) for providing impactful solutions that enhanced client satisfaction.
-

EDUCATION

University of Westminster

MSc in Data Science and Analytics

London, UK

2025

- **Relevant coursework:** Data Mining and Machine Learning, Big Data Analytics, Web and Social Media Analytics, Business Analytics and Data Warehouse.
- **MSc Project:** Enhancing Disaster Response Time Using Deep Learning – Trained YOLO and Faster R-CNN on image datasets to improve prediction and response time for disaster scenarios.

Superior College Lahore

Bachelor of Software Engineering

Lahore, Pakistan

2022

- **Relevant coursework:** Software Development, Full-stack Web Development, Advanced Algorithms, Database Systems, Mobile App Development, and Software Architecture
 - **Final Year Project:** Developed a web application for patient appointment management, reducing administrative workload and improving appointment scheduling efficiency.
-

SKILLS & INTERESTS

Programming Languages: JavaScript, TypeScript, Python

Frontend Technologies: React, React Native, Next.js, Reanimated 4, Unistyles, MUI, Tailwind CSS

Backend Technologies: Node.js, Express.js, Django, FastAPI, RESTful APIs, WebSockets

Mobile & Cross-Platform Development: React Native, Performance Optimization, iOS & Android Deployment

DevOps & Deployment: CI/CD Pipelines, Docker, Kubernetes, AWS (EC2, S3, Lambda), Azure, Automated Deployments

Database Management: MongoDB, MySQL, Firebase, SQLite, Database Optimization

Machine Learning & AI Integration: Google ML Kit, Computer Vision, Real-time Data Processing

Version Control & Collaboration: Git, GitHub, Agile & Scrum Methodologies

Languages: English, Urdu, Hindi, Punjabi
